A dynamical system is a manifold M called the phase (or state) space endowed with a family of smooth evolution functions Φ_t that for any element of $t \in T$, the time, map a point of the phase space back into the phase space. The notion of smoothness changes with applications and the type of manifold. There are several choices for the set T . When T is taken to be the reals, the dynamical ...

Von Neumann was born Neumann János Lajos to a wealthy, acculturated and non-observant Jewish family (in Hungarian the family name comes first. His given names equate to John Louis in English). Von Neumann was born in Budapest, Kingdom of Hungary, which was then part of the Austro-Hungarian Empire. He was the eldest of three brothers; his two younger siblings were Mihály (English: Michael von ...

The tablet and capsule counting machines (counters) or systems typically used by the pharma industry today are essentially mechanical solutions in which the tablets are carefully aligned at specific intervals so that they can be counted one at a time. These systems typically have a large footprint, and require high maintenance to deal with the dust generated when packaging non-coated tablets.
