Finally, adding a “budget burned” line to burn charts, adds the missing EVM metric AC, and additional realism to Agile measurements. It makes little sense to require the development team to

maintain the AC metric in their burn-up charts, so project management can take on this task, adding AC to the burn-up chart and thus providing a complete EVM analog for Agile projects.

As you get older, your body goes through changes even more awesome than the ones you experienced in puberty, which is to say everything puberty gave you falls the f**k apart. Muscle and organ tissue in your body may begin to atrophy and you can start to lose bone density as well. This in turn reshapes you into the Play-Doh thing the grandkids want to exploit for money at every major holiday.
