Statistical mechanics is one of the pillars of modern physics. It is necessary for the fundamental study of any physical system that has a large number of degrees of freedom. The approach is based on statistical methods, probability theory and the microscopic physical laws. It can be used to explain the thermodynamic behaviour of large systems. This branch of statistical mechanics, which treats ...

1. Introduction. Different assays have been introduced to measure antioxidant capacity of foods and biological samples. The concept of antioxidant capacity first originated from chemistry and was later adapted to biology, medicine, epidemiology and nutrition (Cao and Prior, 1998, Floegel et al., 2010, Pellegrini et al., 2003). It describes the ability of redox molecules in foods and biological ...
