First-order logic—also known as predicate logic and first-order predicate calculus—is a collection of formal systems used in mathematics, philosophy, linguistics, and computer science. First-order logic uses quantified variables over non-logical objects and allows the use of sentences that contain variables, so that rather than propositions such as Socrates is a man one can have expressions ...

The fundamental theorem of calculus is a theorem that links the concept of differentiating a function with the concept of integrating a function.. The first part of the theorem, sometimes called the first fundamental theorem of calculus, states that one of the antiderivatives (also called indefinite integral), say  $F$ , of some function  $f$  may be obtained as the integral of  $f$  with a variable bound ...
