Like a lot of children, the five-year-old Stephen Jay Gould was fascinated by dinosaurs, but in his case that interest led to one of the most remarkable and celebrated careers in modern science. From his beginnings as a young paleontologist, with field expertise in the multifarious snails of the West Indies, he became a profound and influential evolutionary theorist.

The only things you can't see here that are available in the original visualization on GE's website are the names of the countries (one per square) that appear only as you hover over them. What we see here looks like an oddly designed version of a treemap, with only one dimension of data (the relative sizes of the squares, which in this case represent the amounts of natural gas left per ...
