How do I correctly specify a part as rigid body in Abaqus CAE?

I use Abaqus for dynamic analysis of composite structures. In Abaqus, the damping can be defined at a material/element level and global level in the analysis.

Structural Integrity provides strategies, analysis and software for managing the aging effects of metal fatigue from cyclic thermal stresses. Informed by decades of experience, we pinpoint limiting locations in your plant and work with you to design practical strategies to manage metal fatigue throughout the life of your plant.

In the Changning-Weiyuan national shale gas demonstration area in the Sichuan Basin, China, commercial shale gas production has mainly been realized through hydraulic fracturing to improve the interconnectivity and flowability in shale gas reservoirs [1-3]. Casing deformation is a great challenge encountered in shale gas production.

Overview. Simulation and Modelling 2018 will provide a unique opportunity to discuss the latest developments being made with computer aided and virtual engineering. Explore the advances being made with integration, optimisation and validation, from design stage right through to manufacturing.
