Stream Discharge Lab The amount of water that a stream carries is its discharge. Discharge is measured in units of volume per unit time (cubic meters per second, for example). Discharge depends upon the velocity of the stream and the stream's cross sectional area. The purpose of this lab is to estimate the discharge of a local stream.

Stream Discharge Lab - Hobart and William Smith Colleges

What is the relationship between the carrying capacity of a stream and its discharge and velocity. As a stream's discharge increases, the stream carrying capacity increases as well. Explain why little water from runoff seeps into the ground in areas of steep slopes.
