We have previously learned that visible light waves consist of a continuous range of wavelengths or frequencies. When a light wave with a single frequency strikes an object, a number of things could happen. The light wave could be absorbed by the object, in which case its energy is converted to heat ...

Light Absorption, Reflection, and Transmission

Negative effects include a need for instant gratification, loss of patience. A number of the survey respondents who are young people in the under-35 age group—the central focus of this research question—shared concerns about changes in human attention and depth of discourse among those who spend most or all of their waking hours under the influence of hyperconnectivity.
