Studying physics again, after I got doctoral degree in mathematics, I have had to study Lagrange's equations and Hamiltonian mechanics. Instead of re-reading Simons' book or trying Goldstein's book, I chose J. Taylor's Classical Mechanics for my self-study, because the Amazon.com reviews on Taylor's book were of full praises.

Figure 1: Plot for problem 1. the minimum of the potential will be at  $r = R$ . We can also find this by setting the first derivative to zero.

Assuming the puck is launched from the position  $\theta = 0$ . Technically with the polar coordinates this should only be correct until the puck hits the origin, but let's assume at the origin  $\theta$  turns negative and the angle ...
