Deficiency in the DAO enzyme system, found in the intestinal mucosa, has been suggested as the most probable cause of histamine intolerance. There are likely genetic variations in individual enzyme function, but when activity of either of these enzymes is insufficient, the resulting excess of histamine may cause numerous symptoms resembling an allergic reaction

Your recovery time depends greatly on which procedure your surgeon performed. The classic 'remove the tendon, scrape down the deformity, attach the tendon' procedure has a recovery time very much like any other achilles injury, but the others are likely to heal much more quickly but perhaps be much more painful, especially the old 'remove a slice from the calcaneus' maneuver.

In the next two articles we're going to discuss the concept of "normal" blood sugar. I say concept and put normal in quotation marks because what passes for normal in mainstream medicine turns out to be anything but normal if optimal health and function are what you're interested in.. Here's the thing. We've confused normal with common.
