### **Chapter Ten: Evolution and Natural Selection: Darwinian Snails**

Darwinian snails: What makes populations evolve? ... The answer will probably be 'no'. It was not the herbicide that changed, however. It was the genetic make-up of the plant population that changed. ... You will examine questions like these while conducting a simulation on the impacts of predators on snails with different shell thicknesses.

Complete the Darwinian Snails packet and hand it in along with the labeled histograms. 2. Take the quiz on Darwinian Snails packet. 3. Download Mitosis Demystified and complete the exercise. 4. Take the self-test; omit question 11. 5. Remove the adult flies (F 1) from your vial.

### **Evolution Simulation - Rensselaer Polytechnic Institute**

A series of NSF grants and collaborations with top evolutionary biologists and educators over the past decade have been instrumental in helping us achieve this important goal. We offer foundation labs designed for non-majors and introductory biology courses as well as more advanced labs for evolution and genetics courses.

### **Evolution and Genetics | SimBio**

All of the modules listed below explore evolutionary topics. Most of the labs are built around classic study systems and work well both in place of traditional "wet" labs, or as homework assignments. Darwinian Snails, Sickle-Cell Alleles, Mendelian Pigs, and Evolutionary Evidence are particularly

popular in introductory-level courses.
