Research into male and female conversational behaviour suggests that men tend to interrupt more than women. More broadly, many theorists argue that women's approach to conversation is more co-operative than men's. They initiate more topics, ask more questions and offer more support and encouragement.

Transcription (linguistics) Orthographic transcription, on the other hand, has a morphological and a lexical component alongside the phonetic component (which aspect is represented to which degree depends on the language and orthography in question). It is thus more convenient wherever meaning-related aspects of spoken language are investigated.
