That humans are causing global warming is the position of the Academies of Science from 19 countries plus many scientific organizations that study climate science. More specifically, around 95% of active climate researchers actively publishing climate papers endorse the consensus position.

### **The 97% consensus on global warming - Skeptical Science**

In one of the great ironies of the modern world, the science that was expected to solve life's mysteries has done just the opposite. New discoveries have called into serious question 150 years of scientific thinking, created deeper mysteries, led to more unanswered questions, and brought us to the brink of forbidden territory when it comes to explaining our origin and existence.
