The Turing test, developed by Alan Turing in 1950, is a test of a machine's ability to exhibit intelligent behaviour equivalent to, or indistinguishable from, that of a human. Turing proposed that a human evaluator would judge natural language conversations between a human and a machine designed to generate human-like responses. The evaluator would be aware that one of the two partners in ...

A comparative study conducted by Logan et al. (2012) indicated that both entertainment and informativeness have a significant impact on the value of social media ads and TV ads. Another significant relationship was also noticed by Logan et al. (2012) between advertising value and customers' attitudes. However, Logan et al. (2012) disproved the impact of irritation on the advertising value.
