Conductors & Insulators Answer Key Question #1 A. Water is a good conductor of electricity. B. Power lines are made to conduct electricity efficiently and are usually made of aluminum or copper with no insulation. C. Ladders that are made of metal or aluminum are good conductors. A wooden ladder that is wet can also be a good conductor.

Conductors & Insulators Answer Key - tampaelectric.com

In a series circuit, adding more bulbs would make all of them dimmer, because this would increase the resistance in the circuit. In a parallel circuit, though, if you add more branches with bulbs in them, they will all still be bright. Current is the same everywhere in a series circuit, but it splits up in branches in a parallel circuit.
