Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Urban sociology is the sociological study of life and human interaction in metropolitan areas. It is a normative discipline of sociology seeking to study the structures, environmental processes, changes and problems of an urban area and by doing so provide inputs for urban planning and policy making. In other words, it is the sociological study of cities and their role in the development of ...

Urban sociology - Wikipedia

Section Editor rating: 8 / 10 Dezene Huber -- Considering the concern (and often reality) of global pollinator declines, it is interesting that the quality of nectar offering by wild and cultivated plants across a geographical range has not been much considered. This paper, as the authors point out, is a good first step in this direction and may help to set the trajectory for further studies.

PeerJ - Ecology section

or the first time in history humans are predominantly urban. Cities occupy less than 2 percent of the Earth's land surface, but house almost half of the human population and use 75 percent of the resources we take from the Earth []. The statistics of urban growth in the late 20th century surpass any other demographic indicators.
