I was going sysprep a base image of Windows Server 2008 this morning and followed my own instructions on sysprepping Windows. I went to the installation DVD and couldn't find sysprep. A quick google later and a bit of poking around revealed that sysprep is now installed by default on Windows Server 2008.

Hate to be the bearer of bad news, but no, still 3.0.0.0 in that location. Further more the auto update function is broken. :-) If you look past the fact that you've must of included a debug version with a lot of informative dialogs, the only thing that that one does is deleting the old one but failed to install the new one.
