The scale-up of size of dislocation-free silicon crystals from the 1950s to today is a key enabler of "Moore's law," which predicted that the cost of transistors would decrease and the number of transistors per device would increase at a regular pace. The increase of wafer size and improvement of wafer physical quality contributed greatly to this trend, as did the complementary decrease of ...

Damascus College is Ballarat's only Catholic co-educational secondary college. It was established after three separate Catholic colleges, St Martin's in the Pines, Sacred Heart College and St Paul's College amalgamated. The college is located on a treed 20 hectare campus in Mount Clear, 7 km from Ballarat's central business district. Damascus College is a day school for secondary students in ...

Gravimetric analysis describes a set of methods used in analytical chemistry for the quantitative determination of an analyte (the ion being analyzed) based on its mass. The principle behind this type of analysis is that once an ion's mass has been determined as a unique compound, that known measurement can then be used to determine the same analyte's mass in a mixture, as long as the relative ...

Compared to other materials, aluminum production is an energy-intensive industry (Abdulkadir et al., 2015) that shows the greatest difference in energy between primary and secondary production (about 174–186 MJ/kg for primary production, compared to 10–20 MJ/kg for secondary production) (Green, 2007). The reason for the much less energy consumed by the secondary Al production is that its ...
