The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

Concrete, the mix of aggregates with water and cement, is flying off. Its best commercially traced and documented component, Portland cement or its variants, has been experiencing an unprecedented development since the turn of the millennium, matched only during a few years after WW2 [, ,]. Almost twenty years after this rebound, no obvious sign of slowing down is detectable, as this paper is ...
