As far as I know, private key can only be retrieved at the time you create the keypair (via EC2 web management console or via API commandline).. So you have to save the private key somewhere and be able to retrieve it at work in order to connect to the instance via SSH, since keypairs' public keys are automatically installed on EC2 servers when you launch them.

Experimental and computational approaches to estimate solubility and permeability in discovery and development settings are described. In the discovery setting 'the rule of 5' predicts that poor absorption or permeation is more likely when there are more than 5 H bond donors, 10 H bond acceptors, the molecular weight (MWT) is greater than 500 and the calculated Log P (CLogP) is greater ...
