Figure 1. Weight of water vs. air at sea level. 6) Since water is not compressible, unlike air it does not become denser as pressure increases. A cubic foot of water at 130 feet depth has the same weight and density as a cubic foot of water at 33 feet.

### **Water and the Physical Laws That Affect All Divers**

Underwater diving, as a human activity, is the practice of descending below the water's surface to interact with the environment. Immersion in water and exposure to high ambient pressure have physiological effects that limit the depths and duration possible in ambient pressure diving. Humans

are not physiologically and anatomically well adapted to the environmental conditions of diving, and ...

### **Underwater diving - Wikipedia**

Commercial diving may be considered an application of professional diving where the diver engages in underwater work for industrial, construction, engineering, maintenance or other commercial purposes which are similar to work done out of the water, and where the diving is usually secondary to the work.
