Snow Falling On Cedars East

Snow refers to forms of ice crystals that precipitate from the atmosphere (usually from clouds) and undergo changes on the Earth's surface. It pertains to frozen crystalline water throughout its life cycle, starting when, under suitable conditions, the ice crystals form in the atmosphere, increase to millimeter size, precipitate and accumulate on surfaces, then metamorphose in place, and ...

The second month of 2019 across New Jersey was not one that will leave an indelible mark in the memory bank. Unlike some of the wild conditions that afflicted many other parts of the nation, NJ precipitation events were only minor to moderate, and there was nothing in the way of stream and river flooding.
