Titration of microorganisms in infectious or environmental samples is a corner stone of quantitative microbiology. A simple method is presented to estimate the microbial counts obtained with the serial dilution technique for microorganisms that can grow on bacteriological media and develop into a colony.

About 68% of values drawn from a normal distribution are within one standard deviation σ away from the mean; about 95% of the values lie within two standard deviations; and about 99.7% are within three standard deviations. This fact is known as the 68-95-99.7 (empirical) rule, or the 3-sigma rule.. More precisely, the probability that a normal deviate lies in the range between $-$ and $+$ is ...

In its 2014 decision of Brinker v. Superior Court, the California Supreme Court explained that employees must be "relieved of all duties" during their statutorily required 30-minute meal periods. Since that time, however, courts have struggled to define the exact status that employees are entitled to enjoy during the shorter 10-minute rest breaks which are also required by statute.
