A/B testing (bucket tests or split-run testing) is a randomized experiment with two variants, A and B. It includes application of statistical hypothesis testing or "two-sample hypothesis testing" as used in the field of statistics. A/B testing is a way to compare two versions of a single variable, typically by testing a subject's response to variant A against variant B, and determining which of ...

1 Marvel ® seems to be the best powdered milk to use for this procedure, but some other brands may work. Most other powdered milks contain more fat which confuses the result, and/or whiteners or other proteins which are not broken down. Use the data on the packet about the percentage of protein to calculate how much powder to use to make your standard solutions.
