A forge is a type of hearth used for heating metals, or the workplace (smithy) where such a hearth is located. The forge is used by the smith to heat a piece of metal to a temperature where it becomes easier to shape by forging, or to the point where work hardening no longer occurs. The metal (known as the "workpiece") is transported to and from the forge using tongs, which are also used to ...

A kitchen knife is any knife that is intended to be used in food preparation. While much of this work can be accomplished with a few general-purpose knives – notably a large chef's knife, a tough cleaver, and a small paring knife – there are also many specialized knives that are designed for specific tasks. Kitchen knives can be made from several different materials.

Actually it is, because you assume there is any other option to play. You can't offer too much power to any one individual or else you run the risk they will use that power to undermine your own. You lack the national epic to have people willing to work for your nation at all cost, you might find some within your retainers willing to do it for *you* (and even then, not necessarily for your rank ...

Berlin. October 7, 1944. A typical day toward the end of the Third Reich. Soldiers die. Civilians suffer. Jews are murdered. Nothing special. In the Beethovensaal a concert is about to begin, but the theater is empty, relieved of its usual audience studded with Nazi elite seeking a brief cultured respite from the stresses of war. The Berlin Philharmonic Orchestra is on stage, awaiting its cue.

Most modern pistols, revolvers, rifles, and some shotgun barrels have what are called rifling in their barrels.. Rifling consists of grooves cut or formed in a spiral nature, lengthwise down the barrel of a firearm. Rifling is placed in the barrels of firearms to impart a spin on the bullets that pass through it.
