Student exploration natural selection answers? You are a bird hunting moths (both dark and light) that live on trees. As you capture the moths most easily visible against the tree surface.

Student exploration natural selection answers?

- Natural selection – the process by which favorable inherited traits become more common over time. Darwin proposed that natural selection was the primary mechanism of biological evolution. Natural selection assumes the following:
 - o More organisms are born than can survive and reproduce.
 - o Organisms compete for limited resources and survival.
