25 Elegant Stained Glass Window Worksheet Answer Key. stained glass window graphing linear equations stained glass window graphing linear equations free as word doc c cx pdf file pdf text file or read online for free stained glass window worksheet this pretty sun design looks like it es straight from a stained glass window can your child brighten it up by adding in some color .

Stained Glass Window Worksheet Answer Key - examget.net

The skills of graphing and writing linear equations will be used to create your stained glass window as well as shading an inequality. This project will be worth a total of 100 assessment points.

Procedure: 1. Start with the 4 sheets of graph paper (provided). Cut the edges off all of the sheets of paper, leaving only the 30x21 sheet of graph ...

STAINED GLASS WINDOW PROJECT - Nine Mile Falls School ...

Stained Glass Window Graphing Project Stained Glass Window is a project that requires students to graph linear equations in order to create a colorful (yet mathematical) display window. Each student selects and graphs at least twelve linear equations from the equation bank to create their own unique stained glass window .

Stained Glass Math Activity | Linear Equations Project

Linear Equations Project... Stained Glass Window This project is a great way for students to demonstrate some of the things theyve learned about graphing equations, they will solve and graph linear equations to create a stained glass window. In addition, they will answer questions pertaining to systems, solutions, and parallel/perpendicular lines.

Graphing linear equations - stained glass window project ...

1) Graph each line on your paper using pencil. Make sure that your lines are straight by using a ruler. Extend the lines to the edge of your paper. You may trim the edges later to make it neat. 2) When you have finished graphing all the lines, color your design to create a stained glass window.

STAINED GLASS WINDOW

SLOPE Stained Glass Project 1. Choose 3 linear equations from each column on page 2. Circle each equation you choose. 2. Create a value table on the worksheet (pages 2-3) for each of the equations you have chosen. 3. Record the slope and y-intercept for each line on the worksheet. 4.

SLOPE Stained Glass Project - HARRISON HIGH SCHOOL

Stained Glass Window Project ALGEBRA II Task: Using what you have learned in your math class about graphing on the coordinate plane, you will design your own stained glass window.

Requirements: 1. Your stained glass window must include at the minimum 15 individual lines or curves, drawn through the entire coordinate plane, and labelled by number

Stained Glass Window Project - Rahway Public Schools

By Jessica Wilkerson Objective: Students will practice graphing lines in slope-intercept form.

Examples include lines with positive, negative, zero, and undefined slopes. When completed, the correctly graphed lines will create a "stained glass window" which can be colored for a fun art-math crossover project. Materials:

By Jessica Wilkerson - Cobalt Institute of Math and Science

Stained Glass Transformations Worksheet Answer Key - When you find a template that you would like to use, you could also to open it on your document window and start customizing it! You will discover others call for a premium account and a number of the templates are free to use.

Stained Glass Transformations Worksheet Answer Key ...

In today's Warm Up I am checking for students' prior understanding of the equation for a horizontal and a vertical line. For today's Stained Glass Activity, it is important for students to recognize $x = a$ and $y = b$ as equations for horizontal and vertical lines. In the past I have found that students easily get confused, representing $x = a$ as a single point instead of a line.

Stained Glass Window Project.pdf - BetterLesson

Stained Glass window Project Follow the steps below to create your own stained glass window. 1. Graph the 12 linear equations on the coordinate plane provided. Identify the slope and y-intercept before you graph. Write the equation neatly on each line that you graph. 2.
