The field of psychology has extensively studied homosexuality as a human sexual orientation. The American Psychiatric Association listed homosexuality in the DSM-I in 1952, but almost immediately that classification came under scrutiny in research funded by the National Institute of Mental Health. That research and subsequent studies consistently failed to produce any empirical or scientific ...

The Book. In Blindspot, Mahzarin Banaji and Anthony Greenwald explore hidden biases that we all carry from a lifetime of experiences with social groups – age, gender, race, ethnicity, religion, social class, sexuality, disability status, or nationality. “Blindspot” is a metaphor to capture that portion of the mind that houses hidden biases.

Blindspot

Transgender is an umbrella term used to describe people whose gender identity (sense of themselves as male or female) or gender expression differs from socially constructed norms associated with their birth sex. This includes androgynous, bigendered and gender queer people, who tend to see traditional concepts of gender as restrictive.

Hans Selye [] first popularized the concept of “stress” in the 1950s. Selye theorized that all

individuals respond to all types of threatening situations in the same manner, and he called this the General Adaptation Syndrome (GAS). He claimed that, in addition to SNS arousal, other bodily systems such as the adrenal cortex and pituitary gland may be involved in a response to threat.
