Dichotomous Keying Introduction to Dichotomous Key Maker: The identification of biological organisms can be greatly simplified using tools such as dichotomous keys. A dichotomous key maker is an organized set of couplets of mutually exclusive characteristics of biological organisms. You simply compare the characteristics of an unknown organism against an appropriate dichotomous key.

Mitosis is the way in which any cell (plant or animal) divides when an organism is:. growing; repairing a damaged part of its body; replacing worn out cells; Growth means getting bigger. An individual cell can grow a certain amount, but not indefinitely. Once a cell gets to a certain size, it becomes difficult for all parts of the cell to obtain oxygen and nutrients by division.
