Water pollution is the contamination of water bodies, usually as a result of human activities. Water bodies include for example lakes, rivers, oceans, aquifers and groundwater. Water pollution results when contaminants are introduced into the natural environment. For example, releasing inadequately treated wastewater into natural water bodies can lead to degradation of aquatic ecosystems.

Water pollution - Wikipedia

RAINMAKER FOR GREY WATER Making Any Source Safe To Drink. The RainMaker for Grey Water is a small, self-contained unit that uses a series of filters to purify any type of dirty water—river water, sewage water, bacteria-filled water, well water—and makes it fit to drink.
