Bring Microsoft SQL Server 2017 to the platform of your choice. Use SQL Server 2017 on Windows, Linux, and Docker containers.

SQL Server 2017 on Windows and Linux | Microsoft

Configure the AD We will create a new AD group that will contain all our SQL Servers that will be using the Group Managed Service Account. Although an account can be linked directly with multiple hosts it is much easier for administrating it using an AD container.

Using Group Managed Service Accounts with SQL Server

The Conn variable is will be used to represent the connection between our VBA project and the SQL database. The receset variable will represent a new record set through which we will give the command to perform our Excel SQL query using the connection we've established.

Excel SQL Query Three Ways | Excelerator.Solutions

Availability groups can no longer be considered new. The feature was released in SQL Server 2012 but I often notice that SQL Server Failover Cluster Instances (FCIs) are much better understood. For a very long time, when people thought about SQL Server they thought about the entire instance as a unit. Microsoft has been implementing [...]

Synchronizing SQL Server Instance Objects in an ...

Business continuity and database recovery - SQL Server. 09/14/2017; 28 minutes to read; Contributors. In this article. APPLIES TO: SQL Server (starting with 2016) Azure SQL Database Azure SQL Data Warehouse Parallel Data Warehouse This article provides an overview of business continuity solutions for high availability and disaster recovery in SQL Server.

Microsoft Access and Cloud Computing with SQL Azure Databases (Linking to SQL Server Tables in the Cloud) Written by: Luke Chung, President About Cloud Computing. We at FMS are very excited about cloud computing and started developing solutions using Microsoft Azure including SQL Azure well before it was released to the general public.

Microsoft Access and Cloud Computing with SQL Azure ...

Many of us who have to develop a Reporting Services (SSRS) application come across various

problems, hurdles or 'gotchas' that cause much head-scratching. We've never seen, elsewhere, the ten most common SSRS problems ever listed, let alone their solution, but then along came Ryan with both. Help is now at hand for anyone wrestling with Reporting Services.

Ten Common SQL Server Reporting Services Challenges and ...

I was discussing with one of my colleague and during the discussion he told me that he is not able to view the list of members available in a AD group since he dont have permission on AD forest.

Use xp_logininfo to retrieve AD group members list - SQL ...

In my previous tip about Using Managed Service Accounts with SQL Server, we discussed how to create and use these accounts. But what if you have Failover Cluster Instances or Always On Availability Groups and you want to gain the benefits of using a Managed Service Account? In this tip, we will look ...

Using Group Managed Service Accounts with SQL Server

Background When a cluster has an Availability Group installed on it, there is an optional listener which is used to manage connections through fail-over events. This listener has an IP address assigned to it and, when the Availability Group fails over...

Connecting to an Availability Group Listener with SQL ...

I described how to configure a SQL Server AlwaysON Availability Group in a multi-subnet environment in a previous tip and in this tip I'll explain how to add a replica to an existing SQL Server AlwaysON Availability Group. We have two machines named PRI-DB1 (IP: 10.X.3.XXX) and PRI-DB2 (IP: 10.X ...

Add secondary replica to existing SQL Server AlwaysON ...

This type of problem is solved easily on MySQL with its GROUP_CONCAT() aggregate function, but solving it on Microsoft SQL Server is more awkward. See the following SO question for help: "How to get multiple records against one record based on relation?" - Bill Karwin Nov 7 '08 at 19:21

How to use GROUP BY to concatenate strings in SQL Server?

I have a question. I know that has been asked before. I looked through the related questions but I could not get my SQL script to work. Here is my query : SELECT T1.PART_ID, T2.ID, T2.DESCRPTION...

SQL Server : Group by string concatenation - Stack Overflow

SQL - Using GROUP BY with HAVING: If you need to restrict the number of rows returned in an SQL query in which you are using an aggregate function and a GROUP BY clause, you can use the HAVING clause instead of the WHERE clause. The HAVING clause offers the distinct advantage over the WHERE clause as it enables you to use aggregate functions to restrict the rows returned in the results.

SQL HAVING Clause | Database Solutions for Microsoft ...

SQL Server AlwaysOn Availability Group Monitoring with SQL Monitor. Managing SQL Server Availability Groups is a bit like spinning plates. But with a good monitoring tool you can see at a glance the status of an Availability Group as a whole, and then go deeper into each replica and database.
