Sterilizing Solution Medical Instruments

by James Hubbard, MD, MPH. For this month's posts, I've chosen some excerpts from my new book, Living Ready Pocket Manual: First Aid, that I think will especially interest my regular blog readers. If you've already bought the book, I'd be interested to hear what you think of these sections.

4 Ways to Sterilize Medical Instruments - The Survival Doctor

Recommended practices for cleaning and sterilizing intraocular surgical instruments From the American Society of Cataract and Refractive Surgery

Since the release of the "Recommended Practices for Cleaning and Sterilizing Intraocular Surgical Instruments the Joint Commission, the Federal Drug Administration, Centers for Disease Control, and Center for Medicare and Medicaid Services have updated their position on the use of Steam Sterilization. Please see the Press Release below and relevant documents regarding this change prior to reading the Sterilization Guidelines. - tassregistry.org

Sterilization refers to any process that eliminates, removes, kills, or deactivates all forms of life and other biological agents (such as fungi, bacteria, viruses, spore forms, prions, unicellular eukaryotic organisms such as Plasmodium, etc.) present in a specified region, such as a surface, a volume of fluid, medication, or in a compound such as biological culture media.

Sterilization (microbiology) - Wikipedia

Recipe for Glass And Window Cleaners Finding a window and glass cleaner that will clean the surfaces thoroughly without leaving streaks and smears often means using one with ammonia (which, by the way, is not good for Plexiglas).

Cleaning, Disinfecting and Sterilizing (Reptiles) - Anapsid

Sterilization is the elimination of all microorganisms on medical instruments that come into contact with open wounds, bodily fluids, and mucous membranes.

Neutering, from the Latin neuter ('of neither sex'), is the removal of an animal's reproductive organ, either all of it or a considerably large part. "Neutering" is often used incorrectly to refer only to male animals, but the term actually applies to both sexes. The male-specific term is castration, while spaying is usually reserved for female animals.

Neutering - Wikipedia

SOUND PLAY. Sounds are medical instruments designed for insertion into the urethra, the tube connecting the bladder with the outside world. Basically, they are highly polished stainless steel rods with a handle and a rounded tip, and they come in sizes which are very close to each other (differing in diameter by less than half a millimeter).
