Symmetry occurs not only in geometry, but also in other branches of mathematics. Symmetry is a type of invariance: the property that something does not change under a set of transformations.. Given a structured object X of any sort, a symmetry is a mapping of the object onto itself which preserves the structure. This occurs in many cases; for example, if X is a set with no additional structure ...

Dynamic Symmetry is more than just lines. It's a powerful tool for photographers, painters...serious artists. It's the unbreakable structure in beautiful art, which has been kept secret from us all. This is why dynamic symmetry is not taught in photography or art schools. We're given the rule of thirds to guide us, but unfortunately it's proven to give us nothing to build on as we advance ...
