On this basis, H1 may be viewed as a time-invariant system with memory. System H2 is causal because the output does not appear before the input. The duration of the output is longer than that of the input. This suggests that H2 must have memory. It is time-invariant. System H3 is noncausal because the output appears before the input.

For Signals and Systems go for Oppenheim/Wilsky. There is no way out. It's tough to understand because the subject itself is highly conceptual and requires deep study. The practice exercises of this book would give you a solid basis in SS. Another book to read is Linear Signals and systems by Lathi. Do not go for Simon Haykin. It is utter crap.
