How can I round a number in excel such as by formatting it so that the actual number changes and not just it's appearance in the cell. For example, if I have 229.729599999998 in a cell and I format the cell to only show 4 decimal places it would now show 229.7296 in the cell but the value of the cell would still be 229.729599999998 so if I were to do any calculations excel would use the longer ...

Solving Equations—Quick Reference - Algebra-Class.com

The decimal (base ten) numeral system has ten possible values (0,1,2,3,4,5,6,7,8, or 9) for each place-value. In contrast, the binary (base two) numeral system has two possible values represented as 0 or 1 for each place-value. Since the binary system is the internal language of electronic computers, serious computer programmers should understand how to convert from decimal to binary.
