Best Answer: The equation linking the frequency, speed and wavelength of electromagnetic waves is  $c=f\lambda$ , where  $c$  is the speed of light,  $f$  is frequency and  $\lambda$  is wavelength. Rearranging gives  $f=c/\lambda$ . Now just plug in the values, remembering that wavelength must be measured in metres, so  $1\text{cm}=0.01\text{m}$ :  $f=(3\times 10^8)/0.01 = 3\times 10^{10}\text{Hz}$  or 30Ghz (Gigahertz).
