Solution Focused Approach With Families

Solution-focused (brief) therapy (SFBT) is a goal-directed collaborative approach to psychotherapeutic change that is conducted through direct observation of clients' responses to a series of precisely constructed questions. Based upon social constructionist thinking and Wittgensteinian philosophy, SFBT focuses on addressing what clients want to achieve without exploring the history and ...

BRIEF - Home

Building on a strengths perspective and using a time-limited approach, solution-focused brief therapy is a treatment model in social work practice that holds a person accountable for solutions rather than responsible for problems. Solution-focused brief therapy deliberately utilizes the language and symbols of "solution and strengths" in treatment and postulates that positive and long ...

Keep Employees Safe. Workers living with unmanaged sleep problems are nearly 3 times more likely to cause a workplace accident. For companies with workers operating in transportation, energy, shipping and manufacturing environments, the safety of their associates could mean the difference between successful operations and headline-generating tragedy.

While traditional talk therapy is key to helping clients process troubling emotional experiences, verbal methods have their limitations, particularly for adults with developmental disabilities. For clients warranting alternative means of communication, more creative interventions are needed—and resources for therapists who work with this challenging population are scarce.
