LAB \_\_\_\_ . NATURAL SELECTION OF "STRAWFISH" You have already been introduced to the idea that when an organism is "selected by nature" to survive, it then has the opportunity to reproduce and pass on the genes for its favorable traits to its offspring. In this way, the genes for more favorable traits — traits that give an individual

Genetics Lab Strawfish. In the experiment about the "strawfish", twenty blue and twenty yellow straws were placed into a paper bag. These pieces of straw were a representation of "strawfish" alleles and each color had incomplete dominance. Two of these straws were drawn out of the bag to represent one strawfish, so when two blue straw alleles ...

Starfish Dissection Introduction: Echinoderms are radially symmetrical animals that are only found in the sea (there are none on land or in fresh water). Echinoderms mean “spiny skin” in Greek. Many, but not all, echinoderms have spiny skin. There are over 6,000 species. Echinoderms usually have five appendages (arms or rays), but there ...
