Spivak's Notation Spivak denotes points in a Euclidean space as row vectors in text, however used in matrix equations -- for example, top of Page 4 -- they can magically turn into column vectors. This can be confusing and while reading the book one must always remember to think of vectors as points in an abstract space, not as of 'rows' or ...

If you do get the book, I recommend getting a used copy of the 4th edition, even though there's a 5th edition available. The main reason is because the solutions manual has been scanned and uploaded to the internet. The difference between the 4th and 5th edition aren't large enough to be worth spending upwards of \$100.
