Statistics 211 Practice Exam 2 Answer key 1. The formula  $E(X) = np$  can be used to find the  
expected value of a. any numeric random variable b. only Poisson random variables c. only normal  
random variables d. only binomial random variables \* e. none of the above 2. For a specific sample  
size, the width of a 95% confidence interval on  $\mu$

### Statistics 211 Practice Exam 2 Answer key

Statistical hypothesis testing. A statistical hypothesis test is a method of statistical inference.  
Commonly, two statistical data sets are compared, or a data set obtained by sampling is compared  
against a synthetic data set from an idealized model. A hypothesis is proposed for the statistical  
relationship between the two data sets,...
