GRADES: **IF YOU MADE A 'D' in chem 101, you really should consider retaking chem 101 or have a very good reason for this score if you decide to continue in chem 102. Ideally, you want to have all of the concepts from chem 101 firmly understood, so you can go on to chem 102. I will always remind you of the concepts we are building on, so you can review the material if you need to.

Titanium dioxide is the most investigated single-crystalline system in the surface science of metal oxides, and the literature on rutile (1 1 0), (1 0 0), (0 0 1), and anatase surfaces is reviewed. This paper starts with a summary of the wide variety of technical fields where TiO₂ is of importance. The bulk structure and bulk defects (as far as relevant to the surface properties) are briefly ...

General Overviews. While anthropocentrism has received attention as a subject worthy of full-length treatments, in many cases overviews are written with an eye toward a specific framing of an environmental or other problem, such as, for instance, animal rights.

Anthropocentrism - Ecology - Oxford Bibliographies

Small heat shock proteins (sHsps) are conserved across species and are important in stress tolerance. Many sHsps exhibit chaperone-like activity in preventing aggregation of target proteins, keeping them in a folding-competent state and refolding them by themselves or in concert with other ATP-dependent chaperones.

Small heat shock proteins: Role in cellular functions and ...

Sometimes I get interesting questions that don't quite fit into any of the existing topics already discussed within the blog and my obsessive/compulsive nature tells me that getting this questions in a random part/page/post of the blog doesn't look quite neat either. Therefore I open this new page for all those questions you have! I...

The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...
