Duplex Pump Configurations in Sewer Lift Stations

A combined sewer is a sewage collection system of pipes and tunnels designed to simultaneously collect surface runoff and sewage water in a shared system. This type of gravity sewer design is no longer used in almost every instance worldwide when constructing new sewer systems. Modern-day sewer designs exclude surface runoff from sanitary sewers, but many older cities and towns continue to ...

Combined sewer - Wikipedia

Pumping stations are facilities including pumps and equipment for pumping fluids from one place to another. They are used for a variety of infrastructure systems, such as the supply of water to canals, the drainage of low-lying land, and the removal of sewage to processing sites. A pumping station is, by definition, an integral part of a pumped-storage hydroelectricity installation.

Sanitary sewer backups usually occur in the lowest open drain. A sewage backup is typically caused by a blockage somewhere in the line. If you experience a backup every time you flush or run water down your sink or bathtub drain, then the problem is likely in your main sewer line since all drains rely on the main sewer line to drain properly.

10 Symptoms of a Damaged Sewer Pipe | PipeLT

Sewer odors in one of our bathrooms. We have already replaced the p-trap under the sink and the wax ring and flange under the toilet. We put in a new septic system almost three years ago, so I doubt there is a problem there.
