Many scientists and philosophers of science have described evolution as fact and theory, a phrase which was used as the title of an article by paleontologist Stephen Jay Gould in 1981. He describes fact in science as meaning data, not absolute certainty but "confirmed to such a degree that it would be perverse to withhold provisional assent". A scientific theory is a well-substantiated ...

Evolution as fact and theory - Wikipedia

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Clearly, if a theory has been falsified it no longer fulfills the definitions at the start of the article. It may well still be a "theory" in the sense of the common usage, but in scientific terms it has become a superseded theory. For example, geocentrism was a theory, as was the concept of four elements (earth, fire, wind and water) and Lamarckian evolution which turned out to be less than ...
