Catalase. Hydrogen peroxide ( $H_2O_2$ ) is a common by-product of metabolic reactions. In high concentration it is toxic; therefore, its accumulation in cells would be harmful. Most tissues, however, contain the enzyme catalase, which catalyzes the breakdown of peroxide to water and oxygen as follows:

1Neurons are different than other cells because they conduct impulse, which no other cell can do. This means that they send signals from the brain to the rest of the body and from the body to the brain. 3Synapses are the little gap between a neuron and a neuron, neuron and a gland, or neuron and a muscle. This space is where neurotransmitters cross, creating impulse. 4Neurotransmitters are ...

In music, an arrangement is a musical reconceptualization of a previously composed work. It may differ from the original work by means of reharmonization, melodic paraphrasing, orchestration, or development of the formal structure. Arranging differs from orchestration in that the latter process is limited to the assignment of notes to instruments for performance by an orchestra, concert band ...
