The output on different platforms can vary a bit (check the man pages to find out more on a particular version), but the key information given is the class of each symbol, and its size (when available). The class can have a number of different values: A class of U indicates an undefined reference, one of the "blanks" mentioned previously. For this object, there are two: "fn_a" and "z_global".

Time is the indefinite continued progress of existence and events that occur in apparently irreversible succession from the past, through the present, to the future. Time is a component quantity of various measurements used to sequence events, to compare the duration of events or the intervals between them, and to quantify rates of change of quantities in material reality or in the conscious ...

Time - Wikipedia

The Smart Cart, a PASCO innovation, is causing a revolution in the physics lab. The Smart Cart was taken through its paces in the April 2018 edition of The Physics Teacher. In this unsolicited review, professors Asif Shakur and Rainor Connor from Salisbury University, Salisbury, MD, examined the use of the Smart Cart in traditional mechanics experiments.

Wireless Smart Cart : PASCO

CAESAR II evaluates the structural responses and stresses of piping systems to international codes and standards. Static and Dynamic analysis, bi-directional links to design.
