Reacting flows (eg. combustion) can be simulated for both premixed and non-premixed configurations under the low-Mach number assumption. For premixed reacting flows, the chemical reaction rate is described using a one-step global reaction based on the Arrhenius law and the parameters can be adjusted appropriately.

Writing a list of references. At the end of all pieces of academic writing, you need a list of materials that you have used or referred to. This usually has a heading: references but may be bibliography or works cited depending on the conventions of the system you use. The object of your writing is for you to say something for yourself using the ideas of the subject, for you to present ideas you ...
