Here's a script to gather complete SQL Server inventory information using ConfigMgr. I've tested and used it to gather information on SQL Server 2005, 2008, 2008 R2, and 2012. I haven't tested it on 2014 explicitly, but it should work fine. Note that Sherry already has a series of mof edits ...

SQL Server Inventory Using ConfigMgr - ConfigMgrFTW!

If you're using SQL Server 2012's hot new AlwaysOn Availability Groups feature, your databases will go offline when your network connection does – even if you're using asynchronous replication. This is not a bug. This is working as designed – and it's important to understand the underlying concepts.
