Flying a kite in a storm was perhaps Benjamin Franklin's most famous experiment that led to the invention of the lightning rod and the understanding of positive and negative charges. The connection between electricity and lightning was known but not fully understood. By conducting the kite experiment Franklin proved that lightning was an electrical discharge and realized that it can be ...

The cylindrical object on the left houses a multi-million volt (MV) high voltage impulse generator, called a Marx Generator, at the Siberian Power Research Institute high voltage testing facility in Novosibirsk, Siberia. The positive polarity and rate of rise of the voltage pulse from the Marx Generator maximized the "efficiency" of creating long sparks.
