Symptoms: DNS clients can find machines by either IP address or by host name, but the server can only find machines by their IP addresses. Probable cause and solution:

**DNS Problems and Solutions - Oracle**

This is unfortunate because poorly written Transact-SQL (T-SQL) code can cause serious performance issues; and fixing such problems by throwing more memory at the server is simply relieving pain rather than fixing the root cause of the problem. Instead, you should identify poorly performing queries and try to make them more efficient.
