Joe Dunbar said.... Hi Joe-My name is Trace, and I'm a chef at a small restaurant in Seattle.I've been reading your stuff for a while on restaurantnewsresource.com, and I had a question about one of your comments. You say, "If you have a 35% food cost percentage, you may see the entrees coming in at 40%. The reason the entrees run higher than the food cost percentage is the beverages typically ...

Lance- great questions. Before we answer both those questions, we'll just say: in all these things, be sure to consult 1) your local building codes and exact requirements/needs for fire safety, and 2) every manufacturer prices differently, so be sure to check with them on these issues when getting an estimate.

Counting the Costs: A Guide to Menu and Food Costing. For someone new to the food service industry, pricing food for sale in a cafe or restaurant may appear as simple an equation as: 'Cost of ingredients' + 'An adequate profit margin'. As anyone who has ever owned or managed a food establishment can confirm, the calculations are far more complex.
